TECHNICAL SKILLS

●Cross-platform mobile Development ● Backend Development ● Web Development ●React Js ●Next Js

SOFT SKILLS

- Leadership
- Great Team player
- Experienced working in an Agile environment with product managersand Developers
- Good understanding of software development life cycle

EXPERIENCE & PROJECTS

Full-Stack Software Engineer at Integrated Software Services Limited,Lagos

March 2021 – November 2022

I worked as a software engineer and was involved in the frontend and backenddevelopment of several projects notably:

- a mobile application for a microfinance bank
- a web-based loan application for an insurance company
- several company websites using a headless CMS

Web Developer at Inspire Space,Lagos

March 2023 – September 2023

- Led the end-to-end development process as the lead web developer, delivering a fully functional MVP.

- Architected and developed the web application with a focus on performance and scalability.

- Integrated multiple APIs to enable seamless communication with third-party services.

- Collaborated with cross-functional teams, including designers and backend developers, to ensure project alignment and timely delivery.

- Delivered a robust MVP that included core features tailored to user needs and business objectives.

Frontend Developer at Tezza business solutions

October 2023 – April 2024

- Worked as a software engineer with a focus on frontend development, leveraging technologies such as React.

- Designed and implemented user interfaces to deliver intuitive and engaging user experiences.

- Managed live deployments, ensuring smooth rollouts and minimal downtime.

- Oversaw version control processes to maintain code integrity and streamline collaboration.

- Contributed to delivering high-quality, maintainable, and scalable frontend solutions.

Software Engineer at P2Vest

- Work as a software engineer with responsibilities spanning frontend and mobile development.

- Lead the development and maintenance of web applications, ensuring they are scalable, efficient, and user-friendly.

- Currently developing an international remittance feature, ensuring compliance with global standards and delivering a seamless user experience.

- Oversee deployment processes for web applications, ensuring smooth updates with minimal downtime.

- Conduct regular maintenance to optimize application performance and address user feedback.

Software Engineer at Ije Fund

- Serve as a software engineer with a focus on web application development for diverse use cases.

- Oversee the deployment and ongoing maintenance of web applications to ensure reliability and performance.

- Delivered fully functional digital lending and loan application.

- Regularly implement updates and improvements to enhance user experience and address emerging requirements.

- Manage efficient deployment workflows to minimize disruptions and ensure smooth application rollouts.

Software Engineer at FarmSmarter

- Specialize in web development, delivering high-quality applications tailored for the agrotech industry.

- Maintain and deploy web applications that are live and actively used, ensuring smooth performance and user satisfaction.

- Contribute to web development, building responsive and scalable user interfaces to support FarmSmarter's mission.

- Handle backend development, implementing robust server-side logic and APIs to power seamless app functionalities.

- Conduct unit testing to ensure code quality, reliability, and adherence to industry standards.

- Developed automation solutions using RoboFlow and Python, streamlining workflows and increasing operational efficiency.

- Continuously optimize the performance of applications through regular updates and maintenance.

Software Engineer at Emporium

- Serve as the lead developer for a web e-commerce application.

- Spearhead web development, ensuring high performance, reliability, and a seamless user experience.

- Manage the maintenance and deployment of the web application, ensuring it remains up-to-date and performs optimally.
